Re: Oral Glucose

Due to supply shortage and backorder of oral glucose, "Transcend 15g Glucose" pouches will be phased in and replacing the current oral glucose. Please follow the CCEMSA Treatment Guideline A07. Diabetic TGL when administering. Two of these pouches equate to your 30g desired dose.

To be clear, there is nothing wrong with the current oral glucose that are on the ambulance, and you should continue to use them as stock remains.

If you have any questions or require further clarification, please contact your division Supervisor or CES.
